```java
public class Animal {
    private String species;
    public Animal() {
        this.species = "Unknown";
    }
    public Animal(String newSpecies) {
        setSpecies(newSpecies);
    }
    public void setSpecies(String newSpecies) {
        this.species = newSpecies;
    }
    public String getSpecies() {
        return species;
    }
    @Override
    public String toString() {
        return "Species: " + species;
    }
}
```
